

How can I view my Unique Entity ID?

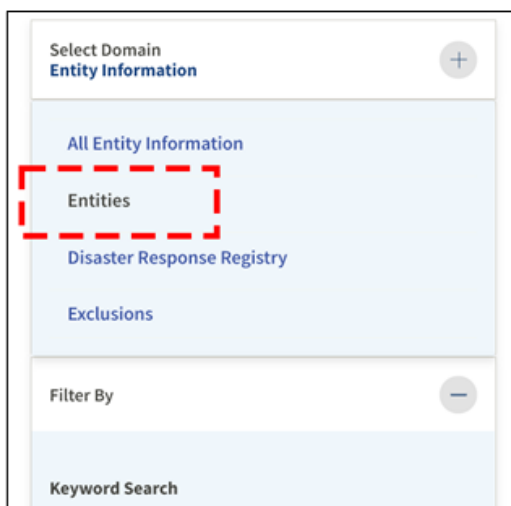

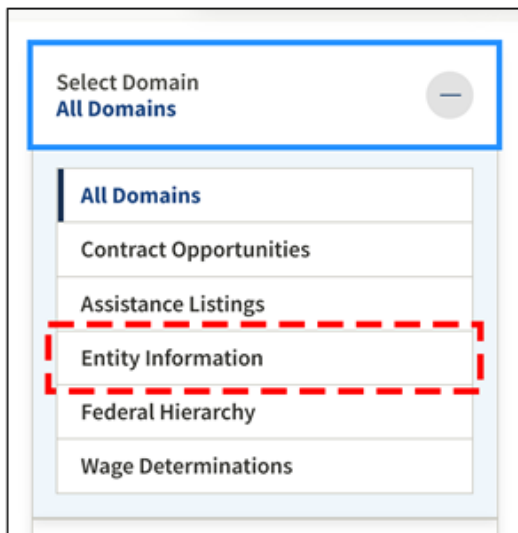

If **you do not have a role with your entity**, you can use the main search to find your entity but note that entities that have opted out of public search are viewable only by federal users and users who have a role with the entity.

1. Log in to SAM.gov.
2. Select "Search" from the header menu.

3. Expand "Select Domain," then select "Entity Information," then "Entities."

- You can then use keywords and filters to search for the entity you are trying to locate. The Unique Entity ID is displayed in the search results for each entity.
